Accordion Door Wood & Color Options

PLEASE NOTE: The stain and color samples on this page have been color matched using a monitor calibrated to the sRGB IEC1966-2.1 color profile. Intended only as a guide for color selection, the actual finish materials will vary due to the natural and acceptable variations in wood grain characteristics, textures, and color tones, as well as the color variation that occurs among individual computer monitors. If color, grain, or tone match is critical, please see an actual color selection chip or refer to Woodfold's custom finish service by contacting your local distributor. *All panel samples show factory default color combinations, unless noted otherwise.

Natural Hardwood Veneers

We've got today's most popular hardwood species to match your interiors. All Noise Control insists on select grade veneers, laminated to an engineered core to ensure excellent dimensional stability. Clear finish is standard; however, custom-stained finish service is always available. Please supply a physical color sample for matching.

*Alder only available in sizes up to 8' 1".

Custom Finish Services

All Noise Control has a long, proud history in custom finishing of fine wood products, so of course our services include custom paint and stain finishes. Additionally, other custom materials can be arranged by asking your Woodfold distributor.

Coordinating Hardware Hinge System

A clear (silver) finish is supplied with Off-White, Chalk, and Amethyst doors. A bronze finish supplied with all others.

Coordinating Vinyl Panel Connectors

We carefully color coordinates our vinyl panel connectors as a standard feature. Combinations include: White with White, Chalk, or Amethyst; Sand with Hardwood Birch, Hardwood Oak, Hardwood Maple, Maple Vinyl, Tan, Tahiti, or Rattan; Silver with Gray Vinyl; and Brown with all other body panels.
